EDUCATION

University of California, Berkeley — Berkeley, CA
M.S. Electrical Engineering and Computer Science (EECS) — *Aug 2025 – May 2026*
- **Notable coursework:** CS Education at Scale, Educational Data Mining, Educational Data Analysis

University of California, Berkeley — Berkeley, CA
B.S. Electrical Engineering and Computer Science (EECS), 3.9 GPA — *Aug 2021 – May 2025*
- **Notable coursework:** Operating Systems, Computer Networks, Building User-Centered Programming Tools, Computational Photography & Computer Vision, Research in AI Education, Computational Genomics, Machine Learning, Databases, Artificial Intelligence, Linux System Administration, Efficient Algorithms & Intractable Problems, Computer Security
- **Member of IEEE-HKN** (Eta Kappa Nu), Mu Chapter (EECS Honor Society)

EXPERIENCE

UC Berkeley | Graduate Student Instructor, CS 88 | Berkeley, CA — Aug 2025 – Dec 2025
- Organized course logistics and accommodations for 500+ students, taught 2 weekly lab sections, held office hours, and wrote exam questions for CS 88: Computational Structures in Data Science (aka DATA C88C)

Databricks | Software Engineer Intern | Mountain View, CA — May 2025 – Aug 2025
- Implemented an extensible and configurable system to automatically remediate failed continuous integration (CI) jobs, saving 120+ engineer hours/month
- Migrated source of truth for CI checker results from GitHub to an internal RPC service, reducing Databricks' dependency on 3rd party APIs and halving request latency

UC Berkeley | Head Teaching Assistant, CS 88 | Berkeley, CA — Jan 2025 – May 2025
- Similar duties to Graduate Student Instructor position above, in addition to managing 12 other course staff members

UC Berkeley | Head Teaching Assistant, DATA 101 | Berkeley, CA — Aug 2024 – Dec 2024
- Created and updated project and homework assignments, taught 2 weekly discussion sections, held office hours, answered student questions on online course forum, and graded exams for DATA 101: Data Engineering

Stripe | Software Engineer Intern | South San Francisco, CA — May 2024 – Aug 2024
- Saved 38+ engineer hours weekly by creating a heuristic to prioritize tests run in continuous integration builds for the largest Ruby codebase in the world (20+ million lines of code and 3+ million tests)
- Created dashboard to evaluate effectiveness of different test ordering heuristics

UC Berkeley | Head Teaching Assistant, CS 88 | Berkeley, CA — Jan 2024 – May 2024
- Same duties as above Jan 2025 – May 2025 experience

Bloomberg | Software Engineer Intern | New York, NY — May 2023 – Aug 2023
- Created an internal Node.js package which retrieves data from GraphQL APIs to aid in migration of Bloomberg's Customer Service Center (CSC) portal to new infrastructure
- Created full stack web subapp for clients to submit and view Bloomberg Valuation (BVAL) Price Challenge tickets in the CSC portal using TypeScript, React, and Express.js
- Reduced maintenance costs by creating the first CSC subapp that uses Bloomberg's internal managed infrastructure and significantly reduced back-and-forth between customer service representatives and clients by adding advanced input validation

Bloomberg | Software Engineer Intern | New York, NY — May 2022 – Aug 2022
- Integrated a new authorization service, Bloomberg Law's (BLAW) Draft Analyzer API, and the core BLAW Ruby on Rails codebase, speeding up BLAW engineers' development process by eliminating the need for apps to go through the core BLAW codebase to check if a user is authorized to hit a certain API endpoint

SKILLS

Programming Languages: Python, Java, Ruby, TypeScript, JavaScript, Golang, Scala, SQL, C, Scheme
Technologies: Git, GitHub, NumPy, Pandas, React, HTML, CSS, Ruby on Rails, MongoDB, GraphQL, Node.js, Express, Jest, JUnit, Pytest, OpenAPI (Swagger), continuous integration, Caddy, Redis, Jenkins
Other: Technical documentation, Jira, Agile, Computer Science Education
